What is CloudFront?

CloudFront

What is CloudFront?

- CloudFront is the **Content Delivery Network (CDN)** of AWS.
- Basically, it is a globally distributed network located on different geographical places.

CloudFront

What is CloudFront?

- The aim of this service is to **provide faster distribution** to the dynamic or the static web contents.
- World-wide distributed data centers which are called **edge locations** are the backbone of CloudFront.

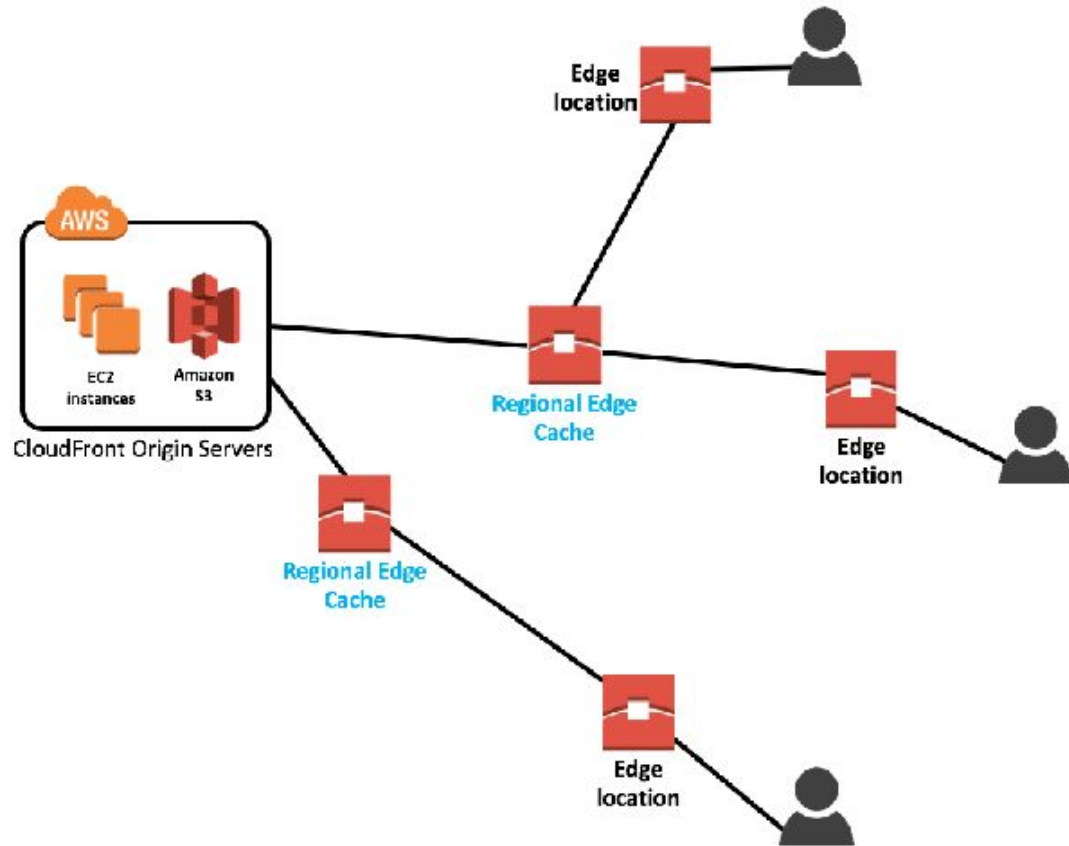

2

CloudFront Infrastructure

CloudFront

CloudFront Infrastructure

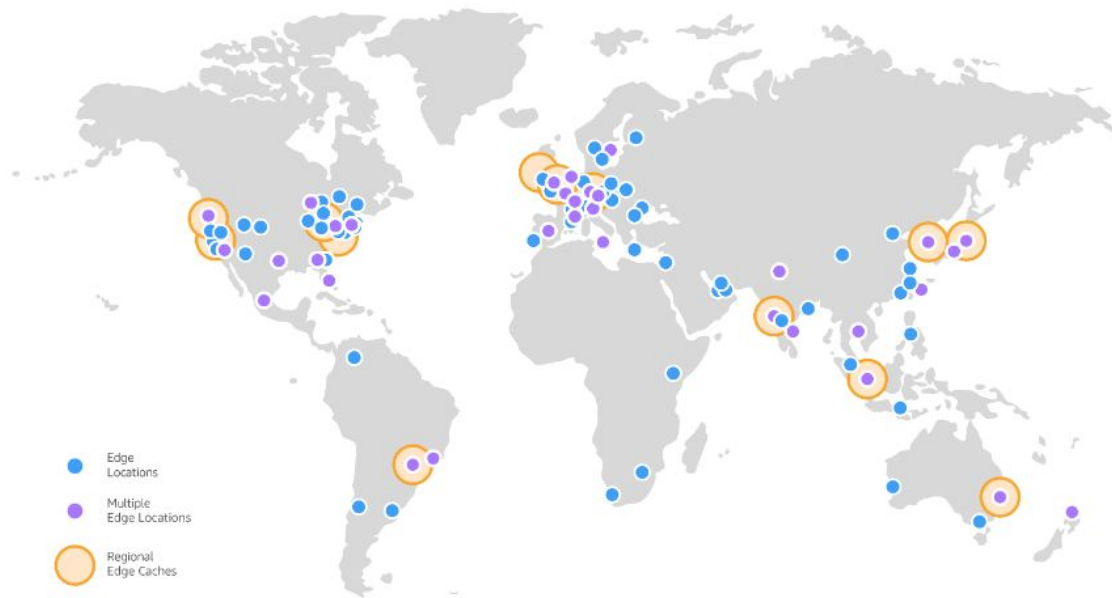

- AWS CloudFront has a world-wide network of **410+ Points of Presence (PoP)***:
 - **400+ Edge Locations**
 - **13 Regional Edge Caches**

*as of Oct 2022.

CloudFront

CloudFront Infrastructure

- These facilities are spread over 90+ cities across 48 countries*.

* Oct 2022

CloudFront Pricing

CloudFront

Pricing

Free Tier

Always free

1 TB of data transfer out
10,000,000 HTTP or HTTPS Requests
2,000,000 CloudFront Function Invocations

Each month

CloudFront Savings Bundle

Amazon CloudFront charges traffic served based on the following dimensions: The CloudFront Security Savings Bundle is a flexible self-service pricing plan that helps you save up to 30% on your CloudFront bill in exchange for a monthly spend commitment for a one-year term. This savings is not limited to data delivered by CloudFront but applies to all CloudFront usage types, including CloudFront Functions and Lambda@Edge. The CloudFront Security Savings Bundle also includes free AWS Web Application Firewall (WAF) usage up to 10% of your committed amount.

Custom Pricing

Custom Pricing

Custom discounted pricing is available for customers willing to commit to a minimum of 10 TB of data transfer per month for 12 months or longer. Discounts vary based on the amount of the commitment. Interested in signing up for discounted pricing?
